About

Senior Mobile Engineer (Flutter), 4+ years and 6 production apps across consumer, B2B, and enterprise — including 4 years on native iOS (Swift) and a solo-built offline-first platform used by 25K+ industrial users. Since Dec 2025 — Head of IT at a cashier-less restaurant startup: Flutter app + self-service kiosks, Go backend, React admin, infrastructure and POS/payment integrations. Deep on payments (Apple/Google Pay, in-app SDKs, card-present POS, QR instant payments), compliance-driven App Store publishing, and Clean Architecture; ship with AI-assisted workflows (Claude Code, Figma MCP) and high-frequency CI/CD (5+ test releases/day). MSc Financial Management; author of an open-source Flutter package on pub.dev. Open to EU relocation and remote (CET±3) — EU Blue Card / Cyprus IT Visa eligible.

Experience

Surprise · Cashier-less Restaurant Platform (FoodTech)

Head of IT · Lead Flutter Engineer · Dec 2025 — Present

- Mobile app and kiosk from one Flutter codebase (**4** flavors: mobile/kiosk × dev/prod): dish configurator, tiered cashback loyalty, iOS Live Activities for order status, rich push, table deep links (QR → order to table, Play Install Referrer), smart upsells, courier delivery. Published on App Store and Google Play; **280+** builds, **81**K lines of Dart, **200** unit/e2e test files in CI, ~**60%** of repository commits.
- Self-service kiosk: Android Lock Task / Device Owner, native Kotlin integration with a card-present POS terminal over the pin-pad TCP protocol, QR instant payments, fiscal receipts.
- Designed and built the new Go backend (fiber, pgx, PostgreSQL primary/replica) replacing a Laravel monolith: **150+** endpoints, **70+** migrations, Swagger, **110**K lines, **140** test files; migrated production and the app in ~**2** months with zero venue downtime. Stateless cart with server-side pricing, SSE menu-version channel, idempotent order creation.
- Payment contour that cannot lose money by construction: idempotent checkout_uid, “paid = the gateway or terminal journal says so”, minute-level reconciliation workers that link payments to orders and resend to the kitchen; recovery paths complete in ≤**60**–**120** s.

Punklab Digital Studio · internal IT subsidiary

Flutter Developer · Feb 2022 — Present · 4+ years

Safety Cage — Lead Developer + Project Manager

Flutter · Clean Architecture · offline-first

- Built and own the mobile safety-reference platform adopted by **25**K+ industrial workers across ~**10** companies in the group — used as mandatory pre-shift reference (~**70%** weekly active rate); replaced paper checklists with a digital handbook for pre-task briefings, training, and on-site self-checks, saving ~**5** hours/worker/month vs paper workflows.
- Designed offline-first content delivery (full reference loads to device for coverage-blind industrial zones); shipped illustrated barrier catalogue, favorites, and instant search — became the de-facto standard handbook across the group.

Zenit FC Youth Academy App — Lead Flutter Developer

Flutter Mobile + Flutter Web · PWA → Mobile migration

- Built and shipped a comprehensive student-athlete platform for Zenit Football Club&#**39**;s youth academy — schedules, matches, anthropometry, performance stats, coach feedback, live video streams, nutrition, and grades in one app; adopted by **350+** academy athletes.
- Migrated existing PWA → native iOS + Android in **2** months — unlocked App Store / Google Play distribution, full offline UX, and push notifications boosting weekly app opens by ~**30%**; sustained **4.6/5** App Store rating post-launch.

B2B Procurement Marketplace — iOS Maintainer + App Store Publishing Expert

Native iOS (Swift) · compliance-driven publishing

- Maintain the iOS app of a B2B procurement marketplace — contractors post tenders, partners bid and submit proposals; iOS surface adopted by **1**K+ business users with sustained **4.2/5** rating across **4** years.
- Over **4** months — resolved every Apple App Review guideline blocker on a previously rejected build, reworked product concept and UX, and successfully shipped to the App Store; owned the full release cycle afterwards (provisioning, signing, escalations, **2024** ATT and privacy-manifest compliance).

EasyCheck — Digital Audit Platform — Lead Flutter Developer

Flutter · Clean Architecture · offline-first

- Lead Flutter delivery of EasyCheck — a digital audit & inspection platform for **200+** on-site auditors and compliance officers; cut average audit completion time by ~**40%** vs paper workflows; full mobile + web parity for field-to-office processes.
- Built offline-first sync (Drift + custom conflict resolution) so inspections complete reliably in coverage-blind industrial sites and warehouses with seamless server sync afterwards; published in App Store and enterprise distribution channel.

Independent / Contract Development

Senior Flutter Developer · Mar 2024 — Present

Moskvichka — Beauty Network App Lead Mobile Developer + Project Manager

Feb 2025 — Present

Flutter · Clean Architecture · Custom BLoC

- Lead end-to-end mobile delivery for an **8**-salon beauty network — online booking, service catalogue, loyalty program, push notifications; replaced fragmented Instagram/phone bookings with a single mobile experience for **2**K+ active customers.
- Owned end-to-end: client brief → App Store + alternative store launch in **6** months; led a **4**-person cross-functional team (QA, backend, UX/UI) with sprint planning, weekly demos, and retros over a **9**-month engagement.

Own Products

kpl360 (KUPOL.360) Technical Co-founder (side project)

Feb 2026 — Present

- Side project alongside primary mobile engineering work — seeking full-time engineering role as main commitment; kpl360 continues with co-founder ownership and external contributors.
- Co-founded and own technical delivery of kpl360 — EdTech safety platform for K–**12** schools: train-the-trainer modules teach educators to run effective Safety Minute lessons with students; one-tap SOS button for emergencies; safety dashboard for school directors.

Achievements & Recognition

TOP-TIER (FEDERAL / OFFICIAL)

- **2** IP copyright certificates issued (**2025**) — for Safety Cage iOS and Android architectures
- Letter of appreciation from CTO of a partner organization (industry hackathon, **2025**)

INDUSTRY RECOGNITION

- Finalist — industry CX award for digital employee experience (**2025**)
- **1**st place at industry hackathon (mentored team, **2025**)

OPEN-SOURCE

- Author of consta_analytics — open-source Flutter package on pub.dev (offline-first event queue with typed event API)

Technical Stack

Languages

Dart · Go · Swift (publishing, maintenance) · Kotlin (native bridges) · Python · TypeScript

Flutter & Architecture

Flutter 3.x · Dart 3.x · Clean Architecture · BLoC · flutter_bloc · Custom BLoC (RxDart) · Riverpod · Provider · dartz (Either<Failure, T>) · auto_route · go_router · injectable · get_it · freezed · json_serializable

Data & Networking

Dio + interceptors · WebSocket · REST API design · Drift (SQLite, type-safe) · Hive · flutter_secure_storage · offline-first patterns

Native & Platform

iOS Native (Swift) — App Store publishing · Android Native (Kotlin) — prototypes · Platform Channels · Deep Links · Universal Links · Flavors

Integrations & Payments

Apple Pay · Google Pay · RevenueCat IAP · In-app payment SDKs · 4× PSP integrations (card-not-present, digital wallets, subscription billing) · Card-present POS terminal integration via custom Android IPC bridge · Firebase (FCM, Auth, Remote Config) · iOS Live Activities · Sentry · Amplitude · Firebase Analytics

CI/CD & Testing

Codemagic · GitHub Actions · Bitbucket Pipelines · Fastlane · Unit & Widget tests · mocktail

Full-stack & Infra (AI-assisted)

Go backend (fiber, pgx, PostgreSQL primary/replica, Swagger, SSE) · FastAPI / Python · React 19 + TypeScript admin · Docker · zero-downtime rollout (GHCR) · Caddy / nginx · Claude Code, Figma MCP

Education

Saint Petersburg State University of Aerospace Instrumentation (SUAI)

BSc · Software Engineering · Computing Systems and Programming

2022

Saint Petersburg University of Management and Economics

MSc · Economics · Financial Management

2024
