About

Flutter Developer with 4+ years at a cross-functional unit inside Gazprom Neft. Author of 6 mobile products in App Store, Google Play and RuStore — including a product with 2 Russian federal software copyrights (RosPatent) and listing in the Unified Register of Russian Software (Ministry of Digital Development). Published Flutter SDK on pub.dev. Since 2025, combining engineering with project ownership: leading a team, coordinating cross-functional tracks, and managing client communication.

Experience

Gazprom Neft Group · punklab unit

Flutter Developer · Feb 2022 — Present · 4+ years

- Joined as the **5**th team member in **2022**; unit scaled to **28** people — **5.6×** growth over **4** years.
- Production releases in App Store, Google Play, RuStore across **5+** corporate products.

Safety Framework (Каркас Безопасности) — Lead Developer + Project Manager

Flutter · Clean Architecture · Offline-first

- Designed, built and solo-maintained from scratch for **3+** years (version **2.4.0**, **20,000+** RuStore installs).
- Obtained **2** RosPatent software copyrights (iOS + Android versions, **2025**) — Russian federal state-issued IP registration.

Zenit FC Academy — Student Portal — Lead Flutter Developer

Flutter Mobile + Flutter Web · PWA → Native migration

- Migrated Flutter Web PWA to native mobile platforms (iOS + Android); published in App Store and Google Play.
- Shipped features driving DAU and retention; refactored and hardened stability.

Gazprom Neft Procurement App — iOS Maintainer + App Store Publishing Expert

Native iOS (Swift) · Compliance-driven publishing

- Live product: version **3.0.201** (Feb **2026**), ~**200** releases in the major line.
- Published in RuStore (**1,000+** installs, **4.2/5**) and in App Store under parallel rebranding.

Parallel Freelance / Contract Development

Senior Flutter Developer · Mar 2024 — Present

Surprise — FoodTech + E-commerce — Senior Solo Flutter Developer

Dec 2025 — May 2026

Flutter · Drift · Swift · Kotlin

- Mobile app for food delivery with a self-service kiosk mode for HoReCa terminals.
- Solo development from scratch to release: **9** screens, **25** use cases, Clean Architecture, separate kiosk branch.

Moskvichka — Lead Mobile Developer + Project Manager

Feb 2025 — Present

Flutter · Clean Architecture · Custom BLoC

- Mobile app for a chain of beauty salons: online booking, service catalogue, push notifications, loyalty.
- Owned the project end-to-end: from client brief to RuStore publication.

White-label e-commerce (NDA) — Mobile Developer

Mar — Aug 2024

Flutter · Custom BLoC

- Rework of a mobile app for a stretching-studio chain.
- Migrated state management from Riverpod to a custom BLoC (per client request).

Own Products

kpl360 (KUPOL.360) — Technical Co-founder

Feb 2026 — Present

- Solo technical delivery end-to-end: Flutter mobile (iOS + Android), FastAPI + Python backend, admin panel.
- Integrations: Sentry, Firebase (Auth, FCM, Remote Config), OTP autofill, iOS Live Activities for alarms, payments. Security audit via Shannon (OSS AI pentester) prior to launch.

Achievements & Recognition

TOP-TIER (FEDERAL / OFFICIAL)

- **2** RosPatent software copyright certificates (Safety Framework, iOS + Android versions, **2025**)
- Listing in the Unified Register of Russian Software (Ministry of Digital Development, Safety Framework, **2025–2026**)
- Letter of appreciation from the IT Director of Gazprom Neft (A. S. Dumin, IT Camp **2025**)

Technical Stack

Languages

Dart (primary)
Swift (maintenance & publishing)
Kotlin (research / prototyping)

Mobile & Cross-platform

Flutter 3.x · Dart 3.x · Clean Architecture
Feature-based architecture

State Management & Logic

Custom BLoC on RxDart (BehaviorSubject / Stream)
Provider
dartz (Either<Failure, T>) for functional error handling

Prior experience: GetX (led migrations toward Clean Architecture)

Navigation & DI

auto_route · go_router · injectable · get_it

Networking

Dio + interceptors · WebSocket
REST API design

Persistence

Drift (SQLite, type-safe) · Hive
shared_preferences · flutter_secure_storage

Code Generation

freezed · json_serializable · build_runner
flutter_gen

Native & Platform

iOS Native (Swift) — App Store publishing, maintenance
Android Native (Kotlin) — research-level (native prototypes)
Platform Channels · Deep Links · Flavors

Payments / SDKs

RevenueCat · Alfa Pay SDK · YooKassa
SberPay · CloudPayments · Tinkoff Pay

Push / Notifications

Firebase Cloud Messaging · OneSignal
flutter_local_notifications
iOS Live Activities

Analytics / Observability

Firebase Analytics · Firebase Crashlytics
AppMetrica · Amplitude · Sentry

CI/CD & DevTools

Codemagic · GitHub Actions
Bitbucket Pipelines

Testing

Unit & Widget tests

Full-stack delivery (AI-assisted)

End-to-end product delivery including backend (FastAPI / Python) and admin panel

Not claiming senior backend expertise; focus on architecture-level product ownership

AI-Augmented Development

Claude Code (code generation, review)
Figma MCP (design-to-code)
AI-assisted security audit prior to release

Education

Saint Petersburg State University of Aerospace Instrumentation (SUAI)
BSc · Software Engineering · Computing Systems and Programming
2022

Saint Petersburg University of Management and Economics
MSc · Economics · Financial Management
2024

Languages

Russian — Native

English — B2 Upper-Intermediate · working proficiency for documentation, code review, technical meetings

Open to relocation and business travel.
