About

Senior Flutter Developer, 4+ years delivering production-grade mobile apps end-to-end. Shipped 6 apps across App Store, Google Play, and alternative stores — including 4 years maintaining a B2B native iOS app (Swift) and an offline-first enterprise reference platform solo-architected for 3+ years. Author of consta_analytics on pub.dev. Led 3 production-scale architecture migrations across Flutter codebases. Since 2025 — combining engineering with product/project management. Strong on App Store publishing (compliance, App Review escalations), payments integrations, and cross-functional team leadership. MSc Financial Management. EU Blue Card / UK Skilled Worker / Cyprus IT Visa eligible — open to sponsorship and relocation (EU / Cyprus / UK).

Experience

Punklab Digital Studio · internal IT subsidiary

Flutter Developer · Feb 2022 — Present · 4+ years

- Since **2025** — combined Developer + Project Manager role on a key team product (Safety Cage).

Safety Cage — Lead Developer + Project Manager

Flutter · Clean Architecture · offline-first

- Built and own the mobile safety-reference platform adopted by **25**K+ industrial workers across ~**10** companies in the group — replacing paper checklists with a digital handbook for pre-task briefings, training, and on-site self-checks.
- Designed offline-first content delivery (full reference loads to device for coverage-blind industrial zones); shipped illustrated barrier catalogue, favorites, and instant search — became the de-facto standard handbook across the group.

Sports Academy — Student-Athlete Platform (Zenit FC youth academy) — Lead Flutter Developer

Flutter Mobile + Flutter Web · PWA → Native migration

- Built and shipped a comprehensive student-athlete platform for Zenit Football Club's youth academy — schedules, matches, anthropometry, performance stats, coach feedback, live video streams, nutrition, and grades in one app; adopted by **350+** academy athletes.
- Migrated existing PWA → native iOS + Android in **2** months — unlocked App Store / Google Play distribution, push-notification engagement, and full offline UX.

B2B Procurement Marketplace — iOS Maintainer + App Store Publishing Expert

Native iOS (Swift) · compliance-driven publishing

- Maintain the iOS app of a B2B procurement marketplace — contractors post tenders, partners bid and submit proposals; iOS surface adopted by **1**K+ business users with sustained **4.2/5** rating across **4** years.
- Over **4** months — resolved every Apple App Review guideline blocker on a previously rejected build, reworked product concept and UX, and successfully shipped to the App Store; owned the full release cycle afterwards (provisioning, signing, escalations, **2024** ATT and privacy-manifest compliance).

EasyCheck — Digital Audit Platform — Lead Flutter Developer

Flutter · Clean Architecture · offline-first

- Lead Flutter delivery of EasyCheck — a digital audit & inspection platform replacing paper checklists for on-site auditors and compliance officers; full mobile + web parity for field-to-office workflows.
- Built offline-first sync (Drift + custom conflict resolution) so inspections complete reliably in coverage-blind industrial sites and warehouses with seamless server sync afterwards; published in App Store and alternative store.

Independent / Contract Development

Senior Flutter Developer · Mar 2024 — Present

Surprise — Digital-First Restaurant App — Senior Solo Flutter Developer

Dec 2025 — May 2026

Flutter · Drift · Swift · Kotlin

- Solo-delivered Surprise — cashier-less restaurant product where mobile + tablet kiosks fully replace physical POS; customers build custom dishes via configurator, earn loyalty rewards, order without queues.
- Designed and shipped the kiosk-mode tablet build for in-venue self-service ordering — Android-native integration with a card-present POS terminal via custom IPC bridge enabled fully cash-free venue operations.

Moskvichka — Beauty Network App — Lead Mobile Developer + Project Manager

Feb 2025 — Present

Flutter · Clean Architecture · Custom BLoC

- Lead end-to-end mobile delivery for an **8**-salon beauty network — online booking, service catalogue, loyalty program, push notifications; replaced fragmented Instagram/phone bookings with a single mobile experience for **2**K+ active customers.
- Owned end-to-end: client brief → App Store + alternative store launch in **6** months; led a **4**-person cross-functional team (QA, backend, UX/UI) with sprint planning, weekly demos, and retros over a **9**-month engagement.

Stretching-Studio Chain App (NDA) Mobile Developer

Mar — Aug 2024

Flutter · Custom BLoC

- Reworked the consumer mobile app for a stretching-studio chain — class booking, membership management, schedule, trainer profiles — over a 5-month engagement.
- Migrated state management from Riverpod to a custom BLoC implementation per client architectural standard; reduced app bundle size by ~15%.

Own Products

kpl360 (KUPOL.360) Technical Co-founder

Feb 2026 — Present

- Co-founded and own technical delivery of kpl360 — EdTech safety platform for K–12 schools: train-the-trainer modules teach educators to run effective Safety Minute lessons with students; one-tap SOS button for emergencies; safety dashboard for school directors.
- Solo end-to-end across 3 codebases: Flutter mobile (iOS + Android), FastAPI backend (~30 endpoints), and admin panel (web); multi-tenant architecture with role-based access for educator + director and offline-first sync for emergency reliability.

Achievements & Recognition

TOP-TIER (FEDERAL / OFFICIAL)

- 2 software copyright certificates issued (national IP registry, 2025) — for Safety Cage iOS and Android architectures
- Government-recognized enterprise software (national software registry listing, 2025–2026)
- Letter of appreciation from CTO of a partner organization (industry hackathon, 2025)

INDUSTRY RECOGNITION

- Finalist — national CX award for digital employee experience (2025)
- 1st place at industry hackathon (mentored team, 2025)

OPEN-SOURCE

- Author of consta_analytics — open-source Flutter package on pub.dev (offline-first event queue with typed event API)

Technical Stack

Languages

Dart · Swift (publishing, maintenance) · Kotlin (prototyping)

Flutter & Architecture

Flutter 3.x · Dart 3.x · Clean Architecture · BLoC · flutter_bloc · Custom BLoC (RxDart) · Riverpod · Provider · dartz (Either<Failure, T>) · auto_route · go_router · injectable · get_it · freezed · json_serializable

Data & Networking

Dio + interceptors · WebSocket · REST API design · Drift (SQLite, type-safe) · Hive · flutter_secure_storage · offline-first patterns

Native & Platform

iOS Native (Swift) — App Store publishing · Android Native (Kotlin) — prototypes · Platform Channels · Deep Links · Universal Links · Flavors

Integrations & Payments

Alfa Pay · CloudPayments · YooKassa · SberPay · RevenueCat IAP · Apple Pay · Google Pay · Firebase (FCM, Auth, Remote Config) · iOS Live Activities · Sentry · Amplitude · AppMetrica

CI/CD & Testing

Codemagic · GitHub Actions · Bitbucket Pipelines · Fastlane · Unit & Widget tests · mocktail

Full-stack (AI-assisted)

End-to-end delivery: backend (FastAPI / Python) and admin panel · Claude Code, Figma MCP

Education

Saint Petersburg State University of Aerospace Instrumentation (SUAI)
BSc · Software Engineering · Computing Systems and Programming
2022

Saint Petersburg University of Management and Economics
MSc · Economics · Financial Management
2024

COURSES & CERTIFICATIONS

2024 **IT Industry Trends & Project Delivery**
Sirius Scientific and Technological University (national STEM excellence center)
